

# Planning of COVID and Non-COVID Care at Facility

# 3<sup>rd</sup> Wave Facility planning

- Objective of facility setup:
  - Both the services should be available to the community
  - Treatment with patients psychological comfort
  - Close to the community
  - Covid and Non Covid management together
  - Management at periphery
  - Private hospitals should be the part of facility management

# Assessment of HR for COVID and Non-COVID

- Need to identify the requirement for the doctors
- Need to identify the support staff for patient care
- Need to identify the support staff to manage facility
- Backup plan for emergency
  - Oxygen
  - Electricity
  - HR

# Requirements of equipment/ Medicine

- We have to prepare for pediatric age group
- Positive cases among Obstetric cases
- Positive cases with comorbid condition
- At least four months stock of medicine should be available
- Coordination with private facility

# Setup of OPD- Triage

- Separate entry
- Separate ILI OPD
- Separate Staff
- Testing facility
- Availability of Pulse oximeter
- Availability of IR thermometer

# Setup of IPD

- Separate entry for both the activity
- Separate Staff
- Back-up staff
- Rotation of staff
- Lab facility
- Help desk for attendants
- Rate of services should be displayed in private facilities

# Capacity building of staff

- Most crucial part of management
- All staff should be trained on their area of specialization
- Reinforce orientation on IPC
- All staff should be trained on Oxygen concentrator
- Capacity building of technical staff on Oxygen and bed audit
- Referral system for step up and step down

# Support for attendants

- Coordination with administration to ensure basic facilities available to attendants
  - Tea stalls
  - Food availability
  - Stay arrangements
- Covid testing of attendants and shopkeepers around covid facilities

- Thanks
