Janmangal Programme in Rajasthan

Concurrent Evaluation

January 2008

By:

State Institute of Health and Family Welfare, Jaipur

(An ISO 9001: 2008 Certified Institution)

PREFACE

State Institute of Health and Family Welfare is designated as Health System Resource Center under, NRHM in Rajasthan. As SHSRC, SIHFW has a specific role to provide technical support to Department of Medical and Health by conducting need based training programme, research studies and evaluations, documenting the health system reports and support in policy formulation and implementation guidelines.

SIHFW -Rajasthan is conducting various studies on the request of DM&HS. In this context recently Institute has completed a "Concurrent Evaluation of Janmangal Programme in Rajasthan". We are pleased to share with our clients a report of this evaluation with recommendations and observations.

Janmangal Couple have been working in the state under the FW programme to increase the access of non clinical contraceptives to the eligible couples in the community. Number of scheme has been introduced in the country based on success of JMC programme in Rajasthan. ASHA Sahyogini Concept is also emerged on the basis of this component. Even after the introduction of Asha Sahyogini, Janmangal have still their relevance in the field.

Institute has undertaken an independent evaluation of the scheme to assess its impact and relevance after introduction of ASHA Sahyogini in the State. Faculty and research team of SIHFW visited many PHCs and villages personally and compiled the observation and findings along with concrete recommendation available. We hope policy planner and management would soon take an appropriate action to enhance the efficiency programme.

We would like to place on record the sense of gratitude for Principal Secretary, Medical and Health, who is also Chairman of Executive Council of SIHFW-R. We are also thankful to Secretary FW cum Mission Director, NRHM, Director RCH for providing the opportunity to us for conducting the evaluation.

DrAkhilesh Bhargava Director

Field Support

Mr. Sanjay Mathur Mr. Ashok Jain Mr. Ravi Garg

Numerous people have contributed to complete this challenging and time bound task of research in which an impact on community was supposed to assess. We acknowledge the contribution of our guide and supporters, research fellows, respondents from the field and experts who have given their suggestions, valuable time and labour to bring out this research document.

We are especially grateful to Sri. R.K. Meena Principal Secretary, Health, Mrs. Neel Kamal Darbari, Secretary, FW and Mission Director, Dr. S. P. Yadav, Director of this Institute and other guide and supporter including Dr. Shiv Chandra Mathur, Professor PSM, SMS Medical College, Jaipur, State representative UNFPA Mr. Hemant Dwivedi and Mr. Sunil Thomas and Demographer, Mr. J.P. Jat, Faculty of SIHFW Dr. Afifa Jaffar and Dr. Mamta Chauhan, Registrar Sri R.K. Sharma for their encouragement, constant support and guidance. We would like to thanks Director FW to provide support in financing this study as well as provide the information and required data from state level.

I grateful acknowledge the hard labour and sincere efforts put in by my colleagues and Research Associates Mr. Sanjay Mathur, Mr. Ashok Jain, Mr Ravi Garg and Faculty of ANMTCs involved in this evaluation Mr. L.R. Gupta, Alwar, Mr, Rupram Yadav, Jalore, Mr Mahemder Singh, Jaipur, Mr. Sudhir Morison, Dugarpur and Ms. Meenu Yadav, Bhilwada for providing their full support in completion of this project.

Dr. Vishal Singh Associate Professor & Research Coordinator

Introduction

1.1 Janmangal Programme in Rajasthan

Extensive experimental efforts in developing countries to explore dynamics of alternative delivery system for family planning services especially the Community Based distribution of contraceptives have been made. In fact availability of supplies and services has been a perennial issue since the inception of Family Planning Programme in the country. Successful programmes have shown moving family planning services from physician based clinical settings to close to the community where demand actually exists.

Community Based Distribution of non-clinical contraceptives (CBD) programme attempts to overcome the limitations of the existing government distribution system by making contraceptives available closer to the community; and break the social and cultural barriers in the use of spacing devices. Community based delivery system are essentially an off-shoot of this inundation approach. It is agreed that enhanced availability of spacing contraceptives will result in increased acceptance leading to fertility reduction, reducing pregnancy risks and child mortality and improving mother's health.

Rajasthan is a only State in the country, where community based distribution of contraceptives and other services like mobilizing people for safe sexual behaviour, immunization, distribution of ORS etc is being implemented through community based volunteers-*Janmangal Couples*. This programme was started in the beginning of last decade (1992) in two districts Udaipur and Alwar. In the year 1995 the programme was expended up to 9 districts .Now looking into the success of the programme it has been expended in all the 32 districts of the state. Under this around 39065 JMC are working in the entire state (Ref. Report of Government Rajasthan Detailed district wise number of JMCs shown in Table 1.

Training of JMCs conducted. Initially there was a provision of two days training but the curriculum of training was revised in the year 2004-5 accordingly Module of the training was developed with the support of UNFPA- IPD Project. Training Trainers were also organized by SIHFW in the state.

1.2 Objectives of the Scheme

The objective of the programme is to promote health of mother and child through proper spacing between births.

1.3 Management Structure

Janmangal Programme is managed through an autonomous body- the State Health and Family Welfare Society for Voluntary Sector (SCOVA) This society in now known as State Health Society. This system was not very effective in terms of programme monitoring and technical support. Considering the scale and intensity of operations, coordination unit (CU) was set up at the state level. The Unit was headed by NGO person, designated as State Coordinator, assisted by two assistants' coordinators and support staff. This unit was responsible for development of comprehensive action plan and implementation of activities. The Contractual positions in the state PMU have been discontinued in the year 2000 and the project is being managed by demography cell.

At the district level deputy CMHO, FW is the nodal person of the programme and District JMC Coordinators have been placed in all the districts to provide support to the nodal person in this programme. This programme is managed by MO at PHC level and ANM at Sub Centre level

1.4 Programme Strategy

Based on the sprit of Volunteerism, the programme is anchored by husband- wife couple at the village level. These couple volunteers are identified as *Janmangal* Couple (JMC). One JMC is selected for every village having a population of 500 to 1000. Two JMC are selected for villages having population between 1000 to 2000 people.

1.5 About this study

After induction of ASHA Sahyogini under the NRHM as key link worker in the structure, State government decided to evaluate the status and effectiveness of the Janmangal Programme in Rajasthan.

State Institute of Health & family Welfare, Rajasthan has been approached to undertake the responsibility to carry out aforesaid assignment. After finalization of the proposal and TOR institute initiate this study in phase manner.

1.6 Purpose and scope of the study

- To find out present coverage and status of the JMC in terms of their training, services provided by them, availability of contraceptives to the eligible couples through JMCs, attendance of JMC in the Millan Baithaks
- To evaluate the contribution and involvement of JMC in promoting services of spacing methods of contraception and termination
- To assess Effectiveness of JMC in addressing the issues of FP unmet needs and HIV AIDS and RCH
- Gaps and problems in the implementation of programme

• Suggest appropriate strategy and implementation frame work for better implementation to justify the utility of the programme.

1.7 The Scope of work includes:

- A. Collection of secondary and primary data through
 - I. Interviews of different stake holders
 - II. Observe the functioning of JM Couple and other responsible stakeholders
 - III. Assess the programme strategy including monitoring supervision of the programme.
- B. Data entry and Analysis of the Data
- C. Documentation of observations of investigators/ Supervisors and findings to be immersed from the data
- D. Sharing of Draft report and collect the feedback
- E. Submission of final report

Methodology

Acquire the supporting data field survey for primary data collection was adopted as methodology. To receive the quantitative results as well as opinion on various programme related issues potential category of stakeholders i.e. Deputy CM&HO, District *Janmangal* Coordinator, MO, PHC, ANM, JMCs, Beneficiaries, and non beneficiaries were identified as respondent of the study. A separate questioner was developed for each category. JMC coordinator and Deputy CMHO FW were given identical responses so only one questioner was used for the same category. Qualitative instruments (in-depth) were used to collect information form opinion leaders, *Janmangal* Coordinators and *Janmangal* Couples.

2.1 Research tools

Questioners and in-depth interview schedules were identified as tool for collecting the primary data. During the design of research tolls consultation was done with research professionals and concerned programme in charge of directorate. A meeting was held to finalize the tools under the chair of Director RCH. Representative from Medical College, UNFPA, Demography cell of DMHS were present in the meeting along with consultants and Faculty of the institute. Each category the questioners were reviewed by experts in this meeting. After incorporation of suggestion these tools were finalized for the printing and research work.

2.2 Selection of the Districts

Under this concurrent evaluation total 7 districts of Rajasthan were identified on various indicators. One criteria was the one district from each zone. Other was geographical area representation. Highest number of JMC and Lowest number of JMC working in the district was another criteria. District Alwar was selected as one of the highest and district S Madhopur was selected as lowest number of JMCs in place. Based on good reporting system Bhilwada was selected Jalore was selected as representative of Desert zone. The districts selected in the sample were — Alwar, Bhilwada, Dungarpur, Srigaganagar, Jalore, Kota, S. Madhopur.

2.3 Selection of the Block

From each district, at least three blocks were selected. And from each block two PHC were supposed to be selected in the sample but due to less number of JMC present at the time of survey at their places more PHCs and sub centers were covered. In some of the district like Jalore, Dugarpur and Sriganganagar and more than three (4-5) PHC were selected in each block to Complete the sample. In selection of Blocks and PHCs, opinion of District JMC coordinator and Deputy CMHO, FW was considered but independent opinion was finalized. Total number of blocks, PHCs, SHC and villages are shown the table 1.1

1.1. Coverage

SN	District Name	Block	PHC	SHC	Village
1	ALWAR	3	6	59	128
2	BHILWARA	3	9	67	139
3	DUNGARPUR	3	11	84	136
4	JALORE	4	15	87	103
5	KOTA	3	10	53	120
6	SHRI GANGANA GAR	3	8	65	131
7	SAWAI MADHOPUR	3	9	75	97
	Total	22	69	490	854

2.4 Information areas

Data collection was based on certain indicators. Framework and design of questioners was based on these indicators i.e. social profile, awareness/ knowledge, experience, attitude/perception, and practices/ behaviours of the functionaries/target audience.

2.5 Sample

It was finalized with mutual understanding that total 1050 Janmangal couples in seven blocks will be interviewed. Further all the 32 Janmangal Coordinators, 7 Deputy CM&HOs of the selected districts interviewed through pre tested the questionnaires send by mail for their responses followed by telephonic interview.

To assess the impacted of Janmangal programme, 5 respondents from beneficiaries and 5 from non-beneficiaries were finalized for the interview as sample from each selected village. Total 10500 respondents were decided to interview to see the coverage and impact of the programme.

Total 6 MO, PHCs, and 30 ANMs from each district were finalized for the sample. In the field situation was slightly different so by all efforts sample a decided couldn't be followed. Number of Villages Sub Centers, PHCs and blocks were increased due to non availability of respondent in sufficient number. Responses of LHVs were similar as MOs and responses of Deputy CM& HO were similar as District *Janmangal* Coordinators they did not give any independent opinion. Both kinds of respondents were primarily not equipped with sound knowledge and exposure about the scheme.

Covered PHCs and Sub Centers were more in numbers comparison to the respondent MOs and ANMs interviewed. During the survey in some of the districts (Dungarpur, Jalore MOs posted on contractual basis at PHCs were on strike so they could not be interrogated. At the time of survey it was the time of marriage season so many JMCs were out of places or at their field. Investigators were remained in the field early morning and late evening but some of the JMCs could not be interrogated due to their absence. In absence of JMCs number of beneficiaries was left out from the survey. At same manner some ANMs were also not found on the place during the survey. But total 43 MOs, 237 ANMs, 20 District Coordinators other than sample districts 1047 JMCs 4933 Beneficiaries and 5120 non beneficiaries were interrogated in detailed for the receiving the primary data. For further reference table 1 is important to see in detail.

2. Number of respondents interrogated

S No	District Name	Total JMC in the District	Total No. of JMC Contacted	JMC Contacted (%)	JMCs found abse nt	JMC (%)	Number of JMCs intervie wed	JMC Intervie wed (%)
1.	ALWAR	1851	153	8.25	8	5.23	145	94.77
2.	BHILWAR A	1745	162	9.28	9	4.94	154	95.06
3.	DUNGARPUR	1039	165	15.88	13	7.88	152	95.12
4.	JALORE	1151	159	13.81	7	4.41	152	95.59
5.	KOTA	836	160	19.14	9	5.63	151	94.37
6.	SHRI GANGANAGAR	1480	156	10.54	14	8.98	142	91.02
7.	SAWAI MADHOPUR	744	158	21.23	7	4.43	151	95.57
	Total	8846	1114	12.59	67	6.02	1047	93.98

As per the record of DMHS total 8846 JMC are working in all 7 sample districts. Out of total 8846 JMC total 11.83% couples were interviewed. District wise detailed in indicated at table 2.1

Table 2.1

SN	Name of the District	Total Number of JMC in District	JMCs Covered for interrogation	% covered under survey
				-
1	Alwar	1851	145	7.83
2	Bhilwara	1745	154	8.82
3	Dungarpur	1039	152	14.62
4	Jalore	1151	152	13.20
5	Kota	836	151	18.06
6	Sri Ganganagar	1480	142	9.59
7	S. Madhopur	744	151	20.29
	Total	8846	1047	11.83

2.6 Field Survey

To collect the data a team of investigators and supervisors was selected. For this purpose a number of potential; candidates were contacted through individual professionals and partner research institutions. A selection committee was appointed to identify the appropriate candidates among the huge list. A panel of 30 investigators was finalized for the field survey. 15 supervisors were also deputed to see accurate and proper field work. Out of 15, supervisors 7 were from the faculties of District Training Centers others were from SIHFW. All the Survey team was oriented and trained before departure to the field. List of investigators and supervisors enclosed.

Observation and findings

3.1 profile of JMC and their beneficiaries

Respondents interrogated during the survey were classified with different indicators particularly the age, education status, family size and use of contraceptives. This classification was done only for District *Janmangal* coordinator, JMCs, Beneficiaries and non beneficiaries.

3.2 Education status and age distribution

Number of illiterate JMC is against guideline. As per table 3 out of total 1047JMCs (2094 persons) 235 were found illiterate. Or semi literate; in other side some highly qualified JMC were also found at the place. Number of JMC qualified up to secondary were 501 (25%), senior secondary were 169, whereas 238 were qualified with different degrees like –AYUSH, first year TDC, or some technical courses. Among number of illiterate JMCs, female are at higher side in comparison to male partners. The illiterate number of JMC is higher in the district Jalore and Dungarpur. Need is to replace them by literate one if option is there in the village.

3 Classification of Respondents by education status

S	Educa tion		JM	Cs			Benefi	ciaries		١	Non ben	eficiarie	es
N o	Statu s	M	F	Total	(%)	М	F	Tota I	(%)	M	F	Total	(%)
1	Illiterat e	40	195	235	11.22	276	2376	2652	53.90	669	1800	2469	48.22
2	Primary	349	539	888	42.42	289	1156	1445	29.37	706	871	1577	30.80
4	Second ary	367	134	501	23.92	117	280	397	8.07	295	245	540	10.54
5	Senior Second	138	31	169	8.07	49	72	121	2.46	90	73	163	3.11
6	Others	124	114	238	11.36	32	132	164	3.33	100	127	227	4.44
7	NR	29	34	63	3.01	21	120	141	2.86	56	88	144	2.81
8	Gradua te	0	0	0	0	0	0	0	0.00	0	0	0	0.00
9	PG	0	0	0	0	0	0	0	0.00	0	0	0	0.00
	Total	1047	1047	2094	100	784	4136	4920		1916	3204	5120	

Age of the couples is also a considerable issue. Out of total surveyed couples 483 (23%) couples has crossed the age limit as per the state guidelines. Some of them are more than 40 years of the age (171). In the rural environment age gap has lot of consideration to express the need and requirements of contraception for limiting the family or delaying the fertility. The couples have no courage to ask the senior people to provide the spacing methods. In village **Dholikhera** district **Bhilwada** we have interrogated a couple (Mrs. Fool Kawanar) who have two daughters in laws in her own family working as AWW and JMC. Their daughter in law could be selected as JMC couple but unfortunately Mother in law is working as JMC how a women, can ask to her mother in law for the supply? It is one instance but there are number of couples who have attained the age of 50 or more than 50 but still they are working as JMC in the village. About 636 couples are also in the age group of 31-35, so they may also be considered for replacement by new couples. It is recommended that couples of more than 35 years of the age should be replaced with immediate effect. (See the table .4 for details.)

4. Age wise distribution of JMC

S N	Name of the Distric t	bel	ow 2	0		20 - 25			26 - 30			31 - 35			36 - 40		Мо	re thar	n 40	No.of JMC Inter view ed
		М	F	Т	M	F	Т	М	F	T	M	F	Т	M	F	Т	М	F	T	
1	Alwar	0	2	2	13	24	37	30	53	83	55	40	95	26	13	39	21	13	34	145
2	Bhilwa ra	0	0	0	20	34	54	33	51	84	51	41	92	27	19	46	23	9	32	154
3	Dunga rpur	0	0	0	24	49	73	51	52	103	52	38	90	15	9	24	10	4	14	152
4	Jalore	0	1	1	15	32	45	41	54	95	46	39	85	30	19	49	20	5	25	152

7	S. Madho pur	0	1	1	8	24	32	36	57	93	55	44	99	36	21	57	16	4	20	151
	Total	0	4	4	104	222	326	272	373	645	350	286	636	198	114	312	123	48	171	1047

3.3 Status of use of contraceptives and Family size of JMCs

As per guidelines of scheme, preference is to be given to those couples while selecting them as JMC they themselves may behave like a role model. But table 5 shows that there were 517 (49%) couples who indicated that they are having more than 2 children. If a couple have more than 3, 4, or 5 children how he/she can motivate other for opting the spacing methods. Data indicated in Table 6 are appreciable that more than 50 % couples have opted permanent methods but again if we analyse the age factor more than 25% couple have completed their ferity cycle. So opting any method has no use. Concept is good. Scheme is good but need is to analyse the implementation part.

5 Average Family size of JMC

3.4 Working experience

Working experience of JMC is counted. In the district data of JMCs has not been up dated. When we interrogated with JMC in the field names as given by district authorities were different from the JMC working in the field. To get actual picture need is issue orders for up dating the records. Out of total JMCs interviewed 10 % were having working experience only one year or less than one year. Maximum number couples were found with experience of 3-5 years, whereas 108 couples are working more than 8 years. (Table-7)

7 Working experience as JMC by duration

3.5 Training status of JMCs

Under the JMC scheme, provision of training of JMCs has been made. Initially JMC were trained for 2 days duration. Again curriculum of training was changed. A revised module was developed by DMHS and training for three days was designed. In the year 2003-04 and 2004-5 training programmes for JMC were organized at mass scale. The JMCs who were trained for 2 days duration, again oriented further for one more day. During the survey it is revealed that about 20% JMC are still untrained out of total surveyed 1047 couples. It shows that training of couple is required again. As per the findings 110 (10.51%) Couple were oriented only for 2 days duration training. As the training was organized in the year 3 -4 years back so need is to orient them to up date the knowledge.

8 Status of Training of JMCs

S	Name of the	JMC Intervie	Unt rain	% Number of Trained JMCs							
N o.	District	wed	ed		For 2 Days Durat ion	%	For three days	%	N / R	%	Total Trained
1	Alwar	145	19	13.10	23	15.86	103	71.03	0	0	126
2	Bhi	154	23	14.94	22	14.29	102	66.23	7	4.55	124
3	Dung	152	29	19.08	10	6.58	112	73.68	1	0.65	122
4	Jalore	152	47	30.92	32	21.05	73	48.03	0	0	105
5	Kota	151	33	21.85	6	3.97	112	74.17	0	0	118
6	Sri Gang	142	38	26.76	6	4.23	98	69.01	0	0	104
7	S. Mad	151	10	6.62	11	7.28	130	86.09	0	0	141
	Total	1047	199	19.01	110	10.51	730	69.72	8	0.76	840

Regarding the subjects covered during the training only 138 participants were acknowledge about all aspects of training contents. Other 781 participants were aware about the responsibility of JMCs, knowledge of contraceptive methods was indicated by 814 candidates. Knowledge up date is an important aspects need to be considered for strengthening of the scheme.

9. Issues Covered During the Training

	Total	1047	781	814	455	302	477	138

3.6 Reason for choosing this voluntary work.

Janmangal couples were asked about their selection. How and why, they have been chosen for this voluntary work. More than 49% were accept this offer due to their self motivation whereas same numbers of people accept that they have come forward to join this noble cause due to motivation of other persons i.e. ANM, AWW or other workers including LHV. Only 1 person gave the reply that it was the compulsion to join the work for him/her. H/she was forced by someone. But it is not clear that how one force other to opt the voluntary profession.

10 Reason for Opting the job of JMC

Sn	Name of the District	Total Number of JMC Interview ed	Self Interest and Motivation	Due to Motivatio n of Others	By compulsion or force	Other	N/R
1	Alwar	145	101	44	0	0	2
2	Bhilwara	154	120	38	0	0	7

	Total	1047	518	538	1	10	17

3.7 Impact of scheme on social life of JMCs

Work of volunteer under the scheme of *Janmangal* considered as a noble cause because the person engaged as volunteers are not getting any financial input against the services. But definitely this scheme can provide an opportunity to the people to gain respect in the society. Table 11 shows that about 80% respondents accept that their society status and respect increased in the society after joining the scheme as volunteers. The decision of Panchayat to recommend them as ASHA —Sahyogini is one of the evidence of this response. There is some example that Janmangal couple have fight election of pantheist and become the public representative.

11. Improvement of self respect and esteem after joining the job of JMC

S n	Name of the District	Total No of JMC Interviewed	Social status and respect improved	Decrees in Status and respect	No change	N/R	Total

	Total	1047	834	2	215	6	1047

3.8 Millan Meetings

Bimonthly meetings held at PHC level is the key monitoring process of JMC. During this meeting following activities are being furnished:-

- a) Collection of reports from JMCs
- b) Continual training and education and the problem solving session
- c) Distribution of Contraceptives
- d) Distribution of IEC/Education material
- e) Information dissemination on programmatic issues
- f) reimbursement of wage loss or honorarium

During the survey various questions were asked from the respondents. JMC were interrogated on this issue in details. Out of total 1047 JMCs interviewed 90 percent were aware about the duration and provision of meeting which is held bimonthly.

12 Status of Millan Meetings

Total 1047 38 3.63 895 85.48 3 0.29 85 8.12 22

Date of this meeting is not fixed at all places but 735 JMC were given the opinion that the date is fixed. But many times during the endemic or epidemic or campaign or festival period the date of meeting changed it is varied place to place district to district. To decide a fix date for the meeting is good sign monitoring system so that information or communication gaps could be avoided.

13 Date of the Millan Meeting

SNo	Name of the District	of JMC Interviewed	%	Fixed	%	Not fixed	%	Don't Know
1	Alwar	145	28.97	42	70.34	102	0.69	1

Various activities are supposed to organize in the meeting, during the interview JMCs were asked about the activities being furnished during the meeting. About 80% JMCs were report that MPR is

being submitted by them to the PHC in charge. Distribution of honorarium, distribution of contraceptives and discussions on problems were the other important activities held during the meeting. New information were also disseminated in the meetings about programme planning or implementation related issues. (See table 16)

16 Activities during the Meeting

3.9 Role and responsibility

Most important task as a responsibility was indicated by JMC during the survey was distribution of contraceptives but about 20% participants has not indicated it as responsibility which is serious issue. It show they are not working or they not aware at all about the responsibilities. Information dissemination, counselling and listing of eligible couples some of the responsibilities accepted by JMCs (Table 17 for further details)

Understanding of JMCs about their role and responsibilities

Other than the basic tasks JMCs are performing other activities also which are not directly to be supposed to perform by them but they have been involved in various activities. As per the findings, they have been working for TSC related activities, motivating people for ANC and institutional delivery. Support in MCHN days is also an important task being done by JMCs. Most common task accepted by JMC is supporting in immunization (60%) for further details see table.18

18 Other works performed by JMC

Name of the District	Number of JMC Intervie wed	TSC related Work	Prevention for Communica ble disease	AN C of PW	Motivation for Institutional Delivery	Suppo rt in MCHN Days	Suppor t in Immuni zation	All	NR

3.10 Logistics and supply

Supply and logistic of contraceptives is an important issue to make sure the regular distribution to the eligible couples. JMC were fully (99%) agreed that they always full supply of contraceptive. Very rarely they feel about short supply which is being sorted out locally.

Contraceptives are being received by JMCs mostly in the meetings but ANMs are the other important source who provides the contraceptives. From this response one important aspect emerged that JMCs those are not been able to attend the meetings regularly but working actively receiving the contraceptives from ANMs otherwise Millan Meetings are the most common and best source of supply of contraceptives to the JMCs.

18 Source of Spacing Methods received by JMC

S.No.	Name of the District	JMC Intervi ewed	During Millan Meeting s	%	By ANM	%	N/R	Suffic ient in numb er	Total	Ins uffi cien t	N /R	Total	%

3.11 Services to the beneficiaries

JMC are providing services to the beneficiaries by motivating them to use the OP, CC, IUD or sterilization. As per the findings one JMC is providing services to average 4.87 couples for using the Oral Pills, 7.25 average couples are being benefited for CC use. Use of Copper T is very less but it is additional work of JMC so credit is to be given to the JMCs that still they are motivating couples for using IUD as well as sterilization also. Further details table 19 shows the actual picture. OP services are better in Bhilwada district in comparison the other district and Kota is far ahead in motivating people for IUD use.

19 Average Numbers of Couples Benefited by JMC

3.12 Honorarium to the JMCs

Over all response of services by JMCs is good but response of administration is not encouraging. Out of total 1047 respondents interrogated during the survey 996 accepts that honorarium is being distributed but it is delayed. Most of the respondents were the opinion that common problem in JM Programme is honorarium which very low and not being paid on time. In other schemes in which JMCs are being involved also received some honorarium. 20 % respondents gave this opinion.

3.13 Problems in the scheme

In the JM Programme governed by FW department has also some problem need to be addressed to make it effective, responsive and cost effective –

Common Problems

- 1. Low attendance of JMCs (Couples) in the meeting
- 2. Lack of Specific IEC /Counselling material
- 3. Selection of couple as JMC is an important. Age factor, illiteracy, and couple not using any method themselves, having more children can be shown as role model. During survey many couple were found those are not fulfilling the criteria and guidelines of state government
- 4. Timely payment of honorarium is the biggest issue raised as problem by respondents
- 5. Training and orientation- Training have been conducted under the scheme but still there is need to organised training for couples who have not attended the training. Reorientation is also required. Lack of training and orientation work is suffered.

Observation and findings: Community response

To assess the impact of any scheme, community response is the most effective variable. Under this concurrent evaluation interview of beneficiaries or recipient of the services from JMCs is the key component identified as one of the informant for the research. Similarly the person living in the same society but not receiving the services of JMC have an important client to be interrogate so that it could be identified that why they are getting services or what view they have about the scheme, about the service provider especially the JMCs. As indicated in the table .3 Out of total 11387 respondents interviewed under the evaluation 10040 respondents were directly from community. Either they are beneficiary or non- beneficiary.

Community response was received from various categories of people. Highest number was from illiterate people 5121 people were illiterate among all Beneficiaries and non beneficiaries.

4.1 Knowledge about JMC couple/Scheme

To assess the impact response from community was received, whether they are aware or not about Janmangal Couple or their services. As per the findings it important to note that about 50% respondents who are not directly benefited by JMCs were aware about the Janmangal Couples their services and the scheme. This is the key indicator to make an evidence that scheme is performing well in the field. Knowledge of beneficiary about the JMC quite clear as they are getting services from them so there is no question about the knowledge of JMC. Even then there are some of the respondents from beneficiaries who recorded that they not aware about JMC. It indicates that beneficiaries are getting services from person other than JMC. This may be ANM, LHV, ASHA Sahayogini or AWW. Table 4.2 indicates the situation in details.

4.2 Knowledge about JM-Couple - Beneficiaries

	Total	5120	250 6	48.9 4	2521	49.23	93	1.82

Community representatives were also aware abut the tasks and responsibilities of JMCs. Table 4.2 indicates that Info Dissemination on Spacing Methods, Distribution of Contraceptives, Motivation for ANC –PNC, Support in MCHN Days are the key tasks performed by JMCs. Knowledge of tasks of JMC among non beneficiaries as indicated in the table is an evidence that JMC are performing there duties with great volunteerism and dedication as they are not getting any encouraging financial support.

4.3 Types of services provided by JM-Couple

Table 4.4 indicates about the status of family of the respondents interrogated during the survey. About 60% respondents were having children either only one or two or currently expecting which indicates that community is aware at large about small family norms. 20 % were having children more than two and 20% have not shown any concern about their family size.

4.4 Status of Family size (Number of Children)

4.2 Knowledge about Contraception / limiting the family size

Community response about knowledge of contraceptives and their different methods and use is interesting to note. Among beneficiaries 88.80% percent were aware about different methods

whereas 74.90% among non beneficiaries were aware. Table 4.5 and 4.6 indicates the details of knowledge about different types of contraceptives among community representatives

4.5. Knowledge about Spacing Methods

SN	District	Benef iciari es	Non Benef iciari es		Kno	owledg	je about	Spacing	Metho	ods

	Total	4920	5120	4369	3835	16	710	535	575	4920	5120

4.3 Source of information

During interview community representatives (both beneficiaries and non beneficiaries) were asked about the source of information received from whom about contraceptive methods. This information is imparted by peers, ANM, AWW, ASHA-Sahyogini and JMC. Contribution of JMC in this aspect is quite high. Out of total beneficiaries interviewed 84.20% were informed by JMCs about spacing methods. In non beneficiaries this number is recorded as 38.16% that indicates that services of JMC are effective and fruitful.

4.6. Types of Contraceptive (Beneficiaries)

4.4 Use of Contraceptive

At the time of interview community representatives were asked about the use of spacing method currently for family planning. As per the findings both beneficiaries and non beneficiaries were using the spacing methods. The non beneficiaries using the method were either they were opted the permanent method or they were getting spacing methods from service provider other than JMC. As per finding out of total beneficiaries 50.18 % were using condom, 36.5 % using Oral Pills and 1.05% were using Copper-T, rest were on permanent methods. This finding provides evidence of active service of JMCs.

Users were also asked about the availability of methods as per their choice. Table 4.9 shows that 85.60 user have facility to receive the spacing methods as per their choice. Alternative methods were also suggested by JMCs to the couple as per 54.61% respondents.

4.5 Reason for not using the spacing or FP Methods

Non beneficiaries were interrogated about the reason of not using the modern methods of contraceptives. As the findings shown in table 4.10 only 1.42 % respondents were given the answer of non availability of contraceptives whereas 5.1% couples were not using any method due to fear. Lack of knowledge is also one of the reasons for non acceptance of spacing methods (4.29%).

Traditional method of contraception is also found in use. Out of total 5120 non beneficiary respondents 16.48% were not using the modern methods because they preferring the traditional methods.

4.10. Reason for not using the spacing or FP Methods

S N	District	No of Non Beneficiari es		Reason for not using the spacing or FP Methods										
			Currently Preg	Using traditio nal Method s	Non availability of Spacing Methods	Fear in using the methods	Lack of Know ledge	N/R						
			NB	NB	NB	NB	NB	NB						
1	Alwar	715	165	139	44	17	16	336						
2	Bhilwara	691	115	51	3	70	6	456						
3	Dungarpur	720	91	56	2	76	4	496						
4	Jalore	770	42	137	8	25	72	325						
5	Kota	741	133	123	4	35	51	401						
6	Sri Ganganagar	747	49	53	7	25	16	615						
7	S. Madhopur	736	75	285	5	55	55	288						
	Total	5120	670	844	73	303	220	2917						

Tab. 4.10 is also providing the evidence that service of JMC not at the fault when the non beneficiaries are not using the spacing methods. At matter of information dissemination can contribute to motivate the person those have fear in the mind about the use of methods and those who were totally blank about the information of methods but JMC only cannot be responsible for this part. ANM is equally responsible.

4.6 Behaviour of JMC in the Community

As a volunteer or social worker, behaviour of JMC has great importance in motivating community for the acceptance of spacing methods. Community representatives were interrogated about the behaviour of the JMCs. Findings on this issue are shown in the table 4.11. Out of total Beneficiaries 71.48% were found the behaviour of JMC is good whereas 68.63% non beneficiaries those were aware about the JMCs found the behaviour of them good.

4.11 Behaviour of JM Couple

4.7 Community Awareness on ASHA-Sahyogini

Under NRHM, ASHA Sahayogni have been introduced as link worker at each AWC level. These ASHA – Sahyogini are also supposed to provide the services of FP to the eligible couples. Community response on the knowledge about Asha –Sahyogini is shown in table 4.12. As per the findings 25.56 % beneficiaries and 33.53% non beneficiaries were aware about ASHA –Sahyogini of there village. Rest were not aware.

4.12. Knowledge about Asha - Sahyogini

SN	District	Benefici aries	Non Benefi	Status of Knowledge about JMC and Programme								
				Awa	are	Not	aware	N/I	7			
				B NB		В	NB	N	NB

	Total	4920	5120	1258	1717	3567	3282	95	121			

On the issue of functions of ASHA –Sahyogini as service provider of FP methods or communicator or counsellor on these matters community representatives were also interrogated. As per the findings Out of total 1258 aware beneficiaries about the scheme 862 were gave the opinion that she providing the spacing methods to couples also. Only 292 non- beneficiaries accept about this service of Asha sahyogini. Same response is received on communication and counselling services or in other words about awareness generation. Detailed is shown in Table 4. 13

4.8 Comparison of FP services of JMC and Asha-Sahyogini

Community representatives were interrogated on the issue of service quality. Out of total beneficiaries interrogated 79.14% were found JMC better whereas non beneficiaries were only 30.46% in favour of JMC as better service provider. No doubt both are community worker but have importance in their own field. ASHA is known as JSY motivator whereas JMC is FP method provider. One cannot replace other.

Chapter -5

Observation and findings: Management response

(1.ANM)

Under the evaluation manger of all level from Sub centre level to State level were interrogated. A mix response was received from this segment. Total 237 ANMs were interrogated from all the 7 districts. Total 182095 eligible couples were registered in a ELA of 2007-8. Detailed of ELA is shown in table 5.1

5.1. ELA of the Sub Centre

Sn	Name of the District	Total Number of ANMs	Total Number of Eligible Couples	Targeted Number of Couples for	Targete Numbe Couple	r of s for
				For Spacing	Permar	-
				Methods	Method	S
					Male	Female
1	Alwar	22	26640	754	42	454
2	Bhilwara	26	16759	2093	208	646
3	Dungarpur	59	30184	2458	45	854
4	Jalore	35	18865	3226	60	500

	Total	237	182095	25730	926	6362

5.1 Service tenure of ANMs at Sub Centre

As per findings 24.47% ANMS were spent less than 1 year at the current sub centre. They were least aware about JMC service providers where as 29.95 % were stayed their present place of posting more then 8 years. Experience wise they were good.

5. 2 working experience as ANM in this sub centre

Sn	Name of the District	Less than one year	1-2 Yrs	2-3 Years	3-5 Years	5-8 Years	More than 8 Yrs	Total
1	Alwar	8	1	2	3	2	6	22

7	S. Madhopur	9	1	2	3	11	9	35
	Total	58	19	22	25	42	71	237

In 237 Sub centres from where ANMs were interrogated 800JMC couples were registered. Out of them 700 (87.5%) were trained. Some JMC were removed from their work due to their regular absenteeism in

the meetings. Number of such JMC was 144. In place of these removed 144 JMCs 105 were selected as new JMCs. In all 237 Sub Centres 119 Village were with out JMCs.

5. 3. Total Number of JMC at Sub enters

Sn	Name of the District	Total Number of ANMs/	Total Number of JMCs	trained JMC	Un trained JMC	JMC removed due to absenteei sm in Meeting	No of JMC newly selecte d	Number of Villages With out JMC

7	S. Madhopur	35	16.7	0.88	0.07	0.0			
	Total	237							

5.2 Demand of Spacing Methods

Out of total 237 ANMs interviewed 37 were replied that they themselves inquired from JMC about the demand and then ensure the supply whereas 76% ANMs received demand from JMCs. Most of the ANMs were aware about the responsibilities of JMCs except 16. Responsibilities of JMCs reported by ANMs were:-

- Listing of Eligible Couple and Contact them
- Information about spacing methods to the Couples and distribution
- Awareness and motivation
- Counselling

5.5 Demand of Contraceptives

S n	Name of the District	Total Number of ANM Interviewed	Received regularly from JMCs	Some times	ANM herself enquired about the demand and ensure the supply	N/R
l 1	Alwar	22	17	1 0	1 3	2

2	Bhilwara	26	23	1	2	0

5.4 Views on Honorarium to JMCs

Implementation of JMC scheme is not directly governed by ANM in the field. There role is limited to the selection of JMCs reporting of the programme is directly given to PhDs but ANMs is the only link between MO and JMC. ANMS are well aware about problems of the sachem. In their opinion various administrative and financial matters are need to be addressed to improve the scheme. Lacking in monitoring system, irregular meetings, lack of motivation among JMCs, introduction of ASHA Sahayogini has created the duplication are some of the issue raised by ANMs as problem in the implementation of scheme. Detailed is shown in table 5.9

5.9. Problems in implementation of Scheme

S n	Name of the District	ANM Intervi ewed	List of	problems

5.5 ASHA-Sahyogini V/s JMC

As per the findings reported from ANMs interviewed, there were 731 ASHA were working in 237 sub centres. In theses sub Centres 203 JMC were selected as ASHA –Sahyogini. Out of total ANMs 77.21% found JMC scheme relevant even after introduction of Asha Sahyogini. In their opinion JMCs has specific role in reducing the TFR but have broader roles and responsibility in which FP programme gets least priority. Table 5.11 shows detailed view.

5.10 Knowledge about ASHA Sahyogini

Chapter -6

Observation and findings: Management response (2. Medical Officer- PHC)

As narrated in chapter one Medical Officer were included in the sample of survey under this evaluation. Out of total covered PHCs 43 Medical officers were interrogated. Rest were couldn't be interrogated because of there absence at PHC during the time of survey. Out of total surveyed PHCs (43) as per the report of MOs there 219036 eligible couples were registered. Out of them 46773 were for spacing method and rest were for sterilization.

5.2.1. ELA of the Sub Centre

Sn	Name of the District	Total Number of MO/PHC Covered	Total Number of Eligible Couples	Targeted Number of Couples for	Targeted Nu Couples for	mber of
				For Spacing Methods	Sterilization	
					Male	Female
1	Alwar	4	32292	1284	60	530
2	Bhilwara	7	16995	3293	42	360
3	Dungarpur	5	17071	3480	14	3495
4	Jalore	7	27801	4984	54	397
5	Kota	6	20277	4824	141	1277
6	Sri Ganganagar	7	57199	17407	213	292
7	S. Madhopur	7	47401	11501	0	1899
	Total	43	219036	46773	524	8250

Working experience of MOs was also recorded during the survey highest number was less then one year. Experience at the same institution can be considered for better information of the field and the implementation of scheme. A new MO cannot be expected to know about the progress of JMC which generally considered the least priority programme for them in comparison to JSY, sterilization or pulse polio.

5.2.2 Working experience as MO in this PHC

Sn	Name of the District	Less than one year	1-2 Yrs	2-3 Years	3-5 Years	5-8 Years	More than 8 Yrs	Total
1	Alwar	1	1	0	1	1	0	4
2	Bhilwara	2	0	2	1	1	1	7
3	Dungarpur	3	1	0	1	0	0	5
4	Jalore	1	3	1	0	0	2	7
5	Kota	3	0	1	0	0	2	6
6	Sri Ganganagar	3	1	2	0	1	0	7
7	S. Madhopur	3	1	0	1	1	1	7
	Total	16	7	6	4	4	6	43

As per the findings emerged from the responses of MO, there 1101 JMC were functional in total 43 PHCs. Out of total 891 were trained. As per this finding about 19.07% JMC were still untrained in the field. Some of the JMC were removed due to absenteeism in the meeting and new JMC have been appointed to replace them.

5.2. 3. Total Number of JMC at PHC

Sn	Name of the District	PHC Covered	Total Number of JMCs	trained JMc	Un trained JMC	JMC removed due to absenteeism in Meeting	Number of JMC newly selected
1	Alwar	4	145	132	13	8	9
2	Bhilwara	7	223	152	71	10	5
3	Dungarpur	5	105	78	27	27	24
4	Jalore	7	114	69	45	13	8

6	Sri Ganganagar	7	181	179	2	30	12
7	S. Madhopur	7	186	186	0	6	6
	Total	43	1101	891	210	144	67

Opinion of MOs was collected on various issues to assess the information of MO on the scheme. Regarding selection of JMC, 79% MO were aware about the process but rest 21% were not clear about the responsibility of selection of JMC is designated to whom. All the MO, who were interrogated during the survey were aware about the training of JMCs and out of total 62 were involved in the training as trainer or as administrator (Table 5.2.5.) MO those were participated in the training as trainer took session on various subjects as indicated in the table

5.2. 4. Selection of JMCs done by

Attendance in the Millan meeting was also accepted by respondent MOs. Different type of responsibilities are being performed by them during the training. Supervisory meetings are also conducted by MO as they admitted during the survey. But no JMC or ANM or other staff members gave any consent on this

issue. Some MOs were said (off the record) that they don't find time to undertake visit to see the performance of the JMCs.

5.2.7 Attendance in the Millan Meetings and Their Role

Sn	Name of the District	MO intervie wed	Meeting attended	Role of MO during the Millan Meeting

Regarding logistic and supply of the spacing methods MO were give the opinion that there no any short supply. This supply is being done regularly from regular stock of PHC. Demand generally received from JMCs during the meeting. Some time it received from ANM also. Most of the MO were aware about the role and responsibilities of the JMCs.

5.2.9 Demand of Contraceptives

	Ganganagar					

Opinion on payment of honorarium was received mix. 50% were found it satisfactory. As per their opinion it is being paid regularly in each meeting but rest 50 % were accept the delay in the payment. Most of the MO found this scheme is depend on motivation of JMCs which is lacking. But in other hand MO are found least interest in the programme. The information received from the MO was practically given by LHV. About 900 ASHA –Sahyoginis are working in all the 43 PHC where MO were interviewed. Out 900 Asha-Sahayogini 44 were selected from JMCs.

5.2.11 Status of Honorarium being received by JMCs as per MO

S	Name of the	Total Number of MO	By monthly in each	Not regular in each	Once in a year

Chapter -7

Findings – District Janmangal Coordinator

As per the proposal all the JMC Coordinator were planned to be interviewed under this evaluation, JMC coordinators of the 7 sample district were directly interviewed and rest were contacted though postal process of interviewed. The questioner was send to the JMC coordinators and Deputy CM&HO, FW with request to send it back with their comments and responses. Out of total only 21 districts were replied. Analysis of this part is being done based on 21 filled questioners of the JMC coordinators of the districts? Deputy CHO FW has not given any separate remarks

1. Status of JMC Coordinators

Sn	Total Number of District Covered under scheme	Number of coordinators
1	Number of district covered in the sample	32
2	Number of Coordinators interviewed	7
3	Number of interviews conducted through post	14
4	Not send the filled formats	11

7.1 Education and experience of coordinators

Out of total 21 interviewed JMC coordinators 10 were graduates and 10 were post graduate rest one has not indicated his qualification. Most of the coordinators have experience more than 5 years some are joined service last year only. Coordinators are working with devotion and commitment but they are very less paid. Multiple responsibilities have been assigned to the JMC coordinator.

2 Education qualifications of JMC Coordinators

Number of JMC Coordinators interviewed	Education Status			
	Graduate	Post Graduate	Other	
21	10	10	1	

3. Working experience as of JMC Coordinators in the district

7.2	
Tra	ini
ng	of

Number of respondents	Less than one year	1-2 Yrs	2-3 Years	3-5 Years	5-8 Years	More than 8 Yrs
21	2	5	2	2	4	6

and Coordinator.

As per the findings received from JMC coordinator, out of total 26639 JMCs 1964 are still untrained in 21 districts. JMC coordinators were oriented in the year 2004-5. Re-orientation of coordinators is also required.

4. Total Number of JMC in the district as per response of JMC Coordinators

Number of respondents	Total Number of JMCs	Number of trained JMC	Un trained JMC
21	26639	24675	1964

7.3. Supervision and monitoring

Supervision and monitoring of the programme is assigned to only JMC coordinator which is very impractical because one person cannot move on in entire district to supervise the programme. Block system is to be established. PHC MOs have least interest to monitor or supervise this programme. Supervisory targets are need to be assigned to the officer like MO, LHV, BPM etc. Presently 10to 15 meetings are being attended by JMC coordinator in the district but to attend the meeting not the solution. Field visit in villages is also to be conducted.

5. Monitoring of Millan Meetings

Number of respondents	Number of meetings monitored	Meeting atte	Meeting attended	
	Up to 8	10-12	15 and more	
21	4	5		12

7.4. Implementation issue

As per the report of JMC coordinators one couple is serving 7 to 15 couples. There is a need to increase the honorarium of JMCs. Irregular payment is the key problem as indicated by respondents. Lack of interest in MOs is another biggest problem.

As per JMC coordinators ASHA- Sahyogini has great importance in the community but they have not been able to replace the JMC. ASHA sahyoginis are report to DWCD they are concerned with women only Male partner among couple is only served by JMC male partner. No doubt Female counter part of JMC couple found more active in the field but male are also providing services. In 21 districts 227 JMCs have been selected as ASHA Sahyogini that is indication of good work of JMCs

6. Average No of Couples served by JMC as per JMC Coordinator

Number of respondents	Average No of Couple served		
	5-10	10-15	More 15
21	7	5	9

6 Status of Honorarium being received by JMCs as per MO

21		227

9 Relevance of scheme after introducing the ASHA -Sahyogini Scheme

Number of respondents	Yes	No
21	20	1

Chapter -8

General Observation and recommendations

In comparison to the inputs provided to the scheme results are very appreciable. JMC are very popular in the villages. More then 90 % users have good rapport with JMC and regularly receiving the contraceptives.

Other than distribution of non clinical contraceptives JMCs are providing counselling services to the eligible couples to use the IUD or sterilization method. Number Motivated people opting sterilization is very high and credit goes to the JMC. JMCs are also contributing in immunization, total sanitation campaign, promotion of DOTS and Depot holder of malaria.

ANMs and MO are participating in the meetings but both have least concern about the scheme. Very less no MOs accepted that they have undertaken the supervisory visit specifically for the scheme. ANMs are also unaware about the record maintained by JMC. Reporting is directly sent to the PHC. Sub Centres do not have the record about progress. They have record of only JMC couples.

In many districts, record of JMCs at district was found very old. The Names of JMC indicated in the list provided to us were not found as practicing JMCs in the field. They have been replaced by new couples long back. So regular updating of data is key issue.

ASHA sahyogini are very less concerned about distribution of non clinical contraceptives. They are mostly responsible to MCHN days and reporting to DWCD. JSY is another area of their commitment. But to serve the eligible couple by distributing contraceptives is none of there business. Most of the couples are receiving contraceptives only from JMCs or ANM or AWW

Some the JMC couples have been selected as ASHA sahyogini but this number is not very large. Only 3-5% cases were recorded.

Irregular payment during the meeting to JMCs found general problem in almost all the district. Many JMC were drop out or absent in the meeting because they did not get money on time. In some of the areas, this payment is being made quarterly or six monthly. An advance fund to each PHC may be given to ensure the regular payment in the meetings. Directions from DMHS may be issued to districts and MO PHCs for using the funds in payment of JMCs honorarium from untied grant of NRHM, in case delay in payment from treasury.

District JMC Coordinators are mostly active but less qualified and less paid. They are given multiple responsibilities in the districts.

Regular feedback system from state via any publication like News letter would be fruitful to express the problems of JMCs. It will encouraged them and motivate to better work. Award scheme to JMCs may be initiated for motivation.

Bimonthly meeting is not a good and sufficient system to monitor the work of JMCs a meeting at sub centre level should also be introduced. BPMs to be appointed under NRHM should make responsible to look after this scheme at block level.

Some places report at their level in registers was not maintained but report was regularly send to PHCs. This aspect is also need to be recorded.

Remuneration of JMCs and District coordinators need to be increased. Decision of increment of honorarium is to be taken by DMHS looking ito the vailable resources but in present context of NRHM HR policy, JMC Coordinator may be paid an amount of Rs 8000.00 per month. As per the requirement fresh recruitment may be done for better candidates. To give identity to the JMCs Identity Cards, Name Plates may be issued.

Remuneration of Janmangal couples may be raised from 200 to 750 so that wages lose and local travel may be compensated.

Training of JMC couples need to be strengthening. ASHA-Sahyogini are being trained for 23 days duration. A week long training of JMC must be ensured along with practical exposure in FP camps.

About 46.13 % couple out of total couples interviewed were found more then 35 years of the age which is higher than the guidelines. The JMCs who have crossed the age limit (35) need to be replaced. There were 312 Couples out of 1047 total JMC crossed the age of 35. 171 were more then 40 found during the survey who were crossed the age limit. Main hurdle fond in the work of senior JMC is the communication with eligibly couples of young age. Age gap creates the communication gap to express the willingness to use the contraception.

UNFPA, Rajasthan has contributed to promote JMC scheme since its beginning. Training of District Janmangal coordinators were introduced and supported by UNFPA under IPD first time in the year 2004. In the year 2005 UNFPA has suggested a programme structure for the JMC which can be adopted with certain amendments if required. (Structure is enclosed)

Comparative analysis of progress as given in Annexure- 2 and three shows that contribution of JMC in service in take is quite appreciable. Detailed is shown in table –7 A

Progress of FP up to December 2007

% of contrib	ution of JMCs			49.91%	50.07	3.18	4.9%

Annexure -1

Proposed Structure of Janmangal Programme (As suggested by UNFPA)

Looking into the constraints and weakness of the programme and present management structure of the programme, there is a need to redesign and restructured it. Looking into the importance of the programme, role of different functionaries involved with this programme and monitoring and supervision system following structure is suggested to strengthening the programme and to achieve the results of the programme.

State Janmangal Project Management Cell

Since the Janmangal Programme is being implemented in entire state and all the district are covered under this scheme so a support unit to manage, monitor, supervise, the activities like-selection of JMCs, Training and orientation of JMCs, bimonthly millan meetings, supplies and distribution of contraceptives, involvement of JMCs in other programmes, follow up the users, issues of counseling there is need to set up a well equipped State Level Janmangal Programme Management Unit.

SJPMU will work under the overall guidance and support of Director FW but Addl Director FW will be responsible for the functioning of SJPMU. One State Janmangal Coordinator, Two Assistant Janmangal Coordinator, one for look after the training and IEC activities and another is to look after the monitoring, supervision and supply etc. To support data analysis there will be one Statistical Assistant and one data entry operator will be placed. Details of the programme structure is as follows

Director-FW

Being a nodal person of the FW programme the over all in charge of the JMC programme and responsibility of the implementation of the programme activities will be of the Director FW.

Addl Director FW

Addl Director FW is the key person of the programme implementation so without involving the Addl Director FW the success of the programme cannot be ensured. As addl Director has the sole responsibility of other FW programme like immunization, RCH, EC and FP Programme so he will also be responsible for JMC Programme.

State Janmangal Coordinator

Looking into the wide coverage area and number of people's involvement in the programme there is a need to have an independent programme coordinator at state level. He will be responsible for:

- > Ensuring timely correspondence with districts and issue the necessary guidelines for programme implementation.
- To look after the quality training of JMCs ,
- To ensure the involvement of MOs in Bimonthly meetings and to create interest and made meetings fruitful.
- > Ensure the timely supply of the contraceptives as per demand of district.
- > To develop mechanism for assessing the programme performance in terms of increase in CPR
- > To ensure timely payments of honorarium of JMC at the meetings so that they could maintain their interest in the programme and participate regularly in the meetings
- Ensure the proper use of IEC material at field level through JMCs

Over all monitoring and supervision of the programme will also be done at the level of State Janmangal Coordinator. He will clarify the doubts, misconceptions about the use of contraceptives and other aspects of the programme.

Assistant Janmangal Coordinators

For the Assistance of State Janmangal Coordinator there should be a provision of two Assistant Janmangal Coordinators. One for looking after the trainings /and IEC or communication activities and another one is for looking after the supervision monitoring of the service delivery, supply and analysis of data.

Assistant Janmangal Coordinators (IEC/Trainings)

Under JMC programme all the JMCs are to be trained. In each year number of JMCs is expected to be dropout and new JMCs are to be recruited. So training of JMC is a continuous process. Dependence on MO-PHC for the training of JMC is not an appropriate decision for ensuring the quality of the training. For ensuring the time bound, systematic, subject specific, target oriented, client centered need based training of JMCs there is need to develop a specific training design based on the need assessment. District level training team is need to be formed and oriented regarding the topics and subjects of the programme and training methodology.

IEC and Communication regarding different topics, issues, programme and interventions are essential parts of the programme. Continuous awareness activities are to be conducted with the JMC to ensure the programme implementation.

To ensure all the activities in professional mode a there should be position of Assistant Janmangal Coordinator to look after the IEC and training activities regarding the programme.

Assistant Janmangal Coordinators (Monitoring and Supervision)

To ensure the effective coverage of the programme there is need to strengthening the monitoring and evaluation of the programme. The present system of supervision of monitoring has no impact to ensure the quality of the programme because one person cannot spare the time to see the whole programme activities. Under proposed State Janmangal cell one position of Assistant programme Coordinator to look after the supervision, monitoring, supply and other related activities is proposed.

District and Block Monitoring

For district present District Janmangal Coordinators are less paid, less motivated and burdened with multiple responsibilities. A district level cell is required to be established under the Coordination of deputy CM&HO, FW. This cell should be equipped with separate computer and online. Each sub centre is required to have progress report of JMCs. JMCs can interact more easily with ANM and LHV. A system of interactive meetings of JMCs at Sub centre level should be initiated.

Annexure -2
